

Oshani Hewawitharana

Software Engineer | Full Stack Developer

Contact No: 0406 502 402 | Email: oshewawitharana123@gmail.com | [LinkedIn](#) | Address: 5 Sutherland Street Melbourne

Professional Summary

Career Profile

- A forward-thinking Software Engineer with about 4 years of experience in developing high-quality web applications and user interfaces. Specialising in Java, Angular, REST API integrations, and Spring Boot, delivering innovative solutions that drive business growth and operational efficiency.
- Proven results in enhancing application performance and reliability, demonstrated by a **50% reduction in deployment time** and a 25% increase in sales through automated customer journey platforms.
- Skilled in Angular, React, AWS services and Agile tools such as JIRA and GIT. Improved **development efficiency by up to 30%** through custom JIRA board development.
- Proficient in building trusting relationships with diverse stakeholders, with a passion for leveraging agile values and technology to deliver customer value.

Skills

- **Frontend:** Angular, React, TypeScript, JavaScript, HTML, CSS, SCSS, Material-UI
- **Backend:** Java, Spring Boot, PHP, Laravel, Hibernate, RESTful APIs, Microservices Architecture
- **Database Management Systems:** MySQL, PostgreSQL, DynamoDB
- **Cloud & CI/CD:** AWS (SNS, SQS, S3, Cloud9, DynamoDB, AWS Lambda, AWS API Gateway), GitHub Action
- **Tools:** Git, Jira, Bitbucket, Splunk, Confluence, Slack, IntelliJ IDEA, Tortoise Git, Grafana
- **Domain Knowledge:** Telecommunications, Education
- **Soft Skills:** Collaborator, Leadership, Event Organizing, Well-Organized, Communication Skills, Attention to Detail

Work Experience

Intern Software Engineer

October 2024 – January 2025

Altech Data Solutions, Melbourne

A technology-driven company specializing in software development, artificial intelligence, and IT solutions, empowering businesses with innovative and scalable digital transformation services.

Project: Insure-Wallet

- Refactored Material-UI (MUI) components, reducing redundant code by 30% and improving frontend performance.
- Designed and implemented responsive UI functionalities, increasing user engagement by 20%.
- Integrated Clerk authentication system, reducing login failures by 40% and enhancing security.
- Collaborated with cross-functional teams to optimize system performance and improving page load time by 25%.
- **Technologies & Tools:** React, Python, Slack, Github, Clerk

Software Engineer

November 2021 – December 2022

Softcodeit Solutions Pvt Ltd, Sri Lanka

An innovative technology company dedicated to delivering cutting-edge software solutions and IT services tailored to empower businesses and drive digital transformation.

Project: Aimsweb Plus

- Developed and implemented the report generation feature, enhancing data accessibility.
- Led security enhancements, reducing vulnerabilities by over 60% through Audit Logging and Checkmarx fixes.

- Conducted automated testing using Cucumber, improving testing efficiency by 20%.
- Optimized complex SQL queries to enable in-depth data analysis critical for software development.
- Created and maintained Liquibase scripts, ensuring database consistency and seamless deployments.
- Collaborated across three time zones (Austin, Brazil, Sri Lanka) in a multicultural Agile Scrum environment, participating in daily scrums, retrospectives, and story-pointing sessions.
- Applied advanced debugging and problem-solving skills, actively contributing to code reviews to uphold high coding standards and mitigate security risks.
- **Technologies & Tools: Angular, SCSS, Spring Boot, AWS, Jira, MySQL**

Software Engineer

May 2021 – November 2021

X-Venture Global Solutions Pvt Ltd, Sri Lanka

A global technology partner offering comprehensive services, including strategic API consulting, enterprise architecture, system integration, business continuity, and product delivery, to empower digital transformations and deliver tomorrow's innovations today.

Project: NextGen Travel Portal

- Mentored 2 new developers and led cross-functional collaboration across three time zones (UK, Sri Lanka, Portugal), improving team efficiency.
- Contributed to architectural design and requirements gathering, ensuring seamless integration across multiple teams.
- Proposed and implemented innovative solutions, accelerating project completion and enhancing international cooperation.
- Developed maintainable code and optimized APIs, increasing productivity by 15% through continuous integration.
- Multitasked as BA, QA, and Developer, ensuring timely project delivery and high-quality standards.
- Applied design patterns to create sustainable, reusable software solutions, improving system scalability.
- **Technologies & Tools: Angular, SCSS, BEM, CSS, Spring Boot, Java 11, Microservices, DynamoDB, PostgreSQL, AWS, Kubernetes, Jira**

Software Engineer

October 2019 – May 2021

Dialog Axiata PLC, Sri Lanka

Sri Lanka's leading telecommunications service provider, delivering cutting-edge mobile, broadband, and digital solutions to millions, with a strong focus on innovation and technology-driven growth.

Project: STO Automation (Automate the process related to standing orders which are done manually), **OneCRM Admin, OneCRM dashboard** (Feature-rich, light-weight, customizable, and user-friendly application used by internal departments to fetch data & do operations), **OneCRM Hotline System** (Feature-rich, light-weight, customizable, and user-friendly customer care system that is used by Dialog Calling center, Front-line staff & franchise staff)

- Developed and maintained full-stack solutions for APIs handling 50+ TPS, ensuring high performance and scalability.
- Automated STO processes, reducing manual work by 70% and improving operational efficiency.
- Implemented Hystrix as a fast-fail mechanism, enhancing system reliability and fault tolerance.
- Ensured code quality and adherence to best practices, improving maintainability and reducing errors.
- Optimized user experience by applying intuitive design principles, enhancing usability for internal teams.
- Engaged in requirement gathering, analysis, and deployments, streamlining workflows and improving system functionality.
- **Technologies & Tools: Angular, SCSS, Spring Boot, Microservices, Oracle Database, Jasper Reports, Bitbucket, Jira, MySQL, Grafana, JsPdf**

Trainee Software Engineer
Allion Technologies, Sri Lanka

September 2018 – March 2019

A trusted provider of innovative software development solutions, specializing in Artificial Intelligence, Data Engineering, DevOps, and Cloud Engineering to deliver high-impact, tailored services to global organizations, governments, and technology startups.

Project: Sonet System

- Maintained and enhanced the Sonet exam management web application, ensuring compliance with PSR 2 standards and improving code consistency.
- Resolved long-standing bugs and developed new features, contributing to enhanced system functionality and performance.
- Implemented a robust support system, improving user satisfaction for an enterprise-level application.
- Enhanced system efficiency and reduced bugs, improving overall reliability as a trainee Software Engineer.
- Demonstrated adaptability and persistence in learning new programming languages to meet evolving project requirements.
- **Technologies & Tools: HTML, CSS, XML, jQuery, JavaScript, PHP, Yii Framework, PostgreSQL, XSS, IIS Server, Tortoise Git**

Other Experiences

Concierge (Part-Time)

December 2022 – Present

Unity Building Management and Concierge (UBMC), Melbourne

Provides tailored property management and concierge services, enhancing the experiences of residents and businesses with a focus on exceptional service.

- Fostered an inclusive environment by ensuring all guests and residents felt welcomed, addressing diverse needs with empathy and professionalism.
- Managed phone and email inquiries with passion, ensuring a professional approach to each interaction.
- Monitored and reported maintenance issues, ensuring quick resolution through the appropriate channels.
- Coordinated visits from service providers, tradespeople, and couriers, ensuring smooth operations.
- Ensured security by responding to breaches, including personal attendance and coordination with authorities when necessary.
- Utilized MyBoss and RMS Systems for streamlined management of operations and guest services.

Education

Master of Information Technology

2022-2024

Southern Cross University, Melbourne (SCU)

- CGPA 6.00 | Awarded with Recognition of Academic Excellence in 2024

Bachelor of Science in Computer Science

2016-2019

University of Colombo School of Computing, Colombo (UCSC)
